

# Heat Sink for Basler ace 2 Cameras#

The heat sink for [Basler ace 2 GigE](#) and [Basler ace 2 USB 3.0](#) cameras provides an efficient way for heat dissipation during camera operation. Installing a heat sink is only necessary if your application causes the camera to exceed its maximum operating temperature specification. This specification is found in the "Environmental Requirements" section of your camera model topic. It is suitable for all ace 2 camera models.

- Order number: 2200000998
- The heat sink is delivered with three screws for attaching the heat sink to the camera.

## Technical Drawings#

## Physical Specifications#

Dimensions	See <a href="#">Technical Drawings</a>
Material	Clear anodized aluminum
Thermal Resistance	2.1 K/W
Screws	M3 × 5 mm, A2

## General Information#

RoHS Compliance	Yes
Warranty	1 year

For more information about your camera, installation, and providing heat dissipation, read the topic about your [Basler ace 2 GigE](#) or [Basler ace 2 USB 3.0](#) camera model as well as the hardware installation topic for [GigE cameras](#) or [USB 3.0 cameras](#) and the [Providing Heat Dissipation](#) topic.
