

## Automate a More Efficient and Accurate Warehouse with Machine Vision

By integrating advanced Zebra vision sensors, fixed industrial scanners, and Aurora software, Graftek helps you automate barcode capture, inspection, and verification. We help you boost efficiency, reduce errors, and improve traceability and accuracy with less labor and cost.

### Automated Conveyor and Tunnel Scanning

Identify and track parcels at high speed with fixed industrial scanners that capture barcodes from all sides, eliminating manual scans and bottlenecks.

### Dock Door Scanning and Tracking

Use mounted scanners and vision sensors to automatically record inbound and outbound shipments and achieve real-time traceability.

### Label and Compliance Verification

Ensure every package label meets standards for accuracy, placement, and content with Zebra's AI-powered OCR and vision software.

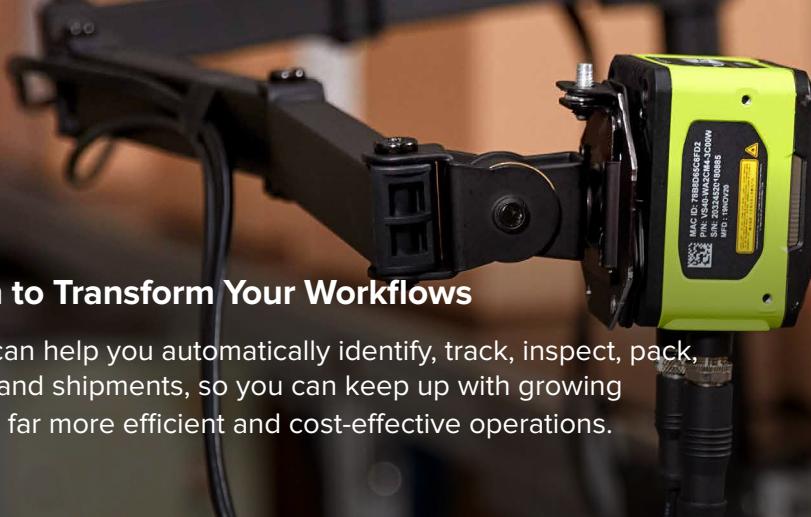

### Package Dimensioning and Inspection

Add vision sensors to your tunnels to automatically measure, verify, and inspect packages for damage or anomalies in real time.

### Packing Bench Automation

Achieve up to 30% faster packing with fewer errors, with automated hands-free barcode scanning and matching label printing.

## Vision Automation to Transform Your Workflows

Zebra machine vision can help you automatically identify, track, inspect, pack, and label more goods and shipments, so you can keep up with growing demand while creating far more efficient and cost-effective operations.

## Simpler and Easier Integration for Fast-Track Improvement

Our Graftek engineering team specializes in designing and deploying Zebra's machine vision devices and software, which offer several key advantages to saving you time and cost:

- Reduced setup, configuration, and deployment time
- Seamless integration with WMS, ERP, and existing automation systems
- Scalable solutions for multi-line or multi-site operations
- Fewer hardware maintenance requirements
- Proven ROI through labor savings and process optimization

## Smarter Vision. Smarter Logistics.

Zebra's complete ecosystem—featuring vision sensors, fixed industrial scanners, and Aurora software—delivers everything you need for reliable, high-speed imaging for the most demanding warehouse, logistics, and transportation automation requirements.

Connect with our experts to learn more and start accelerating throughput, minimizing error, and creating real-time visibility across every process.
